

Greek Regions **for Magento 2**

User & Installation Guide

Version 2.4.7

Overview

The Greek Regions extension for Magento 2 adds the Greek regions in English and Greek language. The list of Greek regions will be available as dropdown options in your store wherever the region information is needed and when the country Greece is selected. The region information is usually asked in cart for tax estimation, in checkout for billing and shipping address, in customer address and in shipping costs calculation based on a region. Useful for localization, shipping costs and tax calculation.

Key Features

- List of Greek Regions
- In English and Greek language
- Useful for localization, shipping costs and tax calculation

Other Features

- Developed by a Magento Certified Developer
- Meets Magento standard development practices
- Simple installation
- 100% open source

Compatibility

Magento Community Edition 2.4

Download the Extension

- 1 Sign in to your account at www.magevision.com
- 2 Navigate to My Account § My Downloads
- 3 Find the extension and click to download it
- 4 Extract the downloaded ZIP file in a temporary directory
- 5 Backup your web directory and store database

Before installing the extension, backup your web directory and store database. All our extensions are tested on clean Magento installations. We can not guarantee compatibility with third party extensions or customized Magento installations. We recommend to install any extension you obtain from us on a testing Magento installation first and then on a live Magento installation in case of incompatibility with third party extensions.

Installing the Extension

Using an Archive and FTP

Upload the extracted folders and files of the extension to the base (root) Magento directory. Do not replace the whole folders, but merge them. If you have downloaded the extension from Magento Marketplace, then create the following folder path `app/code/MageVision/GreekRegions` and upload there the extracted folders and files.

Connect via SSH to your Magento server as, or switch to, the Magento file system owner and run the following commands from the root Magento directory:

```
cd path_to_the_magento_root_directory
php bin/magento maintenance:enable
php bin/magento module:enable MageVision_GreekRegions --clear-static-content
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
php bin/magento maintenance:disable
```

Log out from Magento admin and log in again.

Via Composer (Magento Marketplace)

Connect via SSH to your Magento server as, or switch to, the Magento file system owner and run the following commands from the root Magento directory:

```
cd path_to_the_magento_root_directory
php bin/magento maintenance:enable
composer require magevision/module-greek-regions
php bin/magento module:enable MageVision_GreekRegions --clear-static-content
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
php bin/magento maintenance:disable
```

How to Use

Once installed, the Greek regions are automatically available as dropdown options whenever the country Greece is selected — in cart tax estimation, checkout billing and shipping address, customer address book, and shipping cost configuration.
