

Mass Email Customers

User/Installation Guide

Version 2.4.2

1. Overview

The Mass Email Customers extension gives you the ability to send an email to all or selected registered and guest customers. Send a mass email with one click from the admin sales order grid and the admin customer grid. Email template customization like Magento's default email templates. An easy way to contact your customers and keep them up-to-date with your news, events and updates.

2. Key Features

- Send mass email to all or selected customers
- Send mass email with one click from the admin sales order grid and admin customer grid
- Easy email template customization like Magento's default email templates
- Custom email variables for customer and order data

3. Other Features

- Developed by a Magento Certified Developer
- Meets Magento standard development practices
- Simple installation
- 100% open source

4. Compatibility

Magento Community Edition 2.4

5. Download the Extension

- [Sign in](#) to your account
- Navigate to menu **My Account** → **My Downloads**
- Find the extension and click to download it
- Extract the downloaded ZIP file in a temporary directory

6. Backup your web directory and store database

Before installing the extension, backup your web directory and store database. All our extensions are tested on clean Magento installations. We can not guarantee of compatibility with third party extensions or customized Magento installations. We recommend to install any extension you obtain from us on a testing Magento installation first and then on a live Magento installation in case of incompatibility with third party extensions.

7. Installing the Extension using an archive and FTP

- Upload the extracted folders and files of the extension to base (root) Magento directory. Do not replace the whole folders, but merge them. If you have downloaded the extension from Magento Marketplace, then create the following folder path **app/code/MageVision/MassEmailCustomers** and upload there the extracted folders and files.
- Connect via SSH to your Magento server as, or switch to, the Magento file system owner and run the following commands from the (root) Magento directory:
 - `cd path_to_the_magento_root_directory`
 - `php bin/magento maintenance:enable`
 - `php bin/magento module:enable MageVision_MassEmailCustomers --clear-static-content`
 - `php bin/magento setup:upgrade`
 - `php bin/magento setup:di:compile`
 - `php bin/magento setup:static-content:deploy`
 - `php bin/magento maintenance:disable`
- Log out from Magento admin and log in again

8. Installing the Extension via composer

- Connect via SSH to your Magento server as, or switch to, the Magento file system owner and run the following commands from the (root) Magento directory:
 - `cd path_to_the_magento_root_directory`
 - `php bin/magento maintenance:enable`
 - `composer require magevision/module-mass-email-customers`
 - `php bin/magento module:enable MageVision_MassEmailCustomers --clear-static-content`
 - `php bin/magento setup:upgrade`
 - `php bin/magento setup:di:compile`
 - `php bin/magento setup:static-content:deploy`
 - `php bin/magento maintenance:disable`

9. How to Use

Navigate to Magento Admin under **Stores** → **Configuration** → **MageVision Extensions** → **Mass Email Customers** to configure the Sender email and the Mass Email Template.

The default email template that the extension uses, includes just a simple example message. So you will need to customize it and add your message. Navigate to Magento Admin under **Marketing** → **Email Templates** and add a new template. Load as default template the “Mass Email Customers” and see the template's information. You can customize the template subject and content. Except from the default Magento's variables, you can also use some custom variables that you can use to add customer and order data to your email content.

Variables:

“customer_name“ : Customer Name

“customer_email“ : Customer Email Address

“increment_id“ : Order Id (only for sending email from the admin sales order grid)

Example for displaying customer's name in the email template

```
{{trans "Hello, %customer_name," customer_name=$customer_name}}
```

Example of displaying increment order's id in the email template

```
{{var increment_id}}
```

Give a name to your custom template and save it. Afterwards navigate again to Magento Admin under **Stores** → **Configuration** → **MageVision Extensions** → **Mass Email Customers** and configure the extension to use your new custom email template.

Configure email sender and email template

Stores → Configuration → MageVision Extensions → Mass Email Customers

The screenshot shows the Magento 2 Configuration interface. On the left is a vertical sidebar with icons for Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, and System. The main content area is titled "Configuration" and includes a search icon, a notification bell, and a user profile for "admin". Below the title, there is a "Store View" dropdown set to "Default Config" and a "Save Config" button. A left-hand menu lists categories: GENERAL, CATALOG, CUSTOMERS, SALES, and MAGEVISION EXTENSIONS. The "MAGEVISION EXTENSIONS" category is expanded to show "Mass Email Customers". The "General" tab is active, displaying two dropdown menus: "Mass Email Sender" (set to "General Contact") and "Mass Email Template" (set to "Mass Email Customers (Default)"). A note below the template dropdown states: "Email template chosen based on theme fallback when 'Default' option is selected."
