Admin Category Product Thumbnail

User/Installation Guide

Version 2.2.1

1. Overview

The Admin Category Product Thumbnail extension is a simple but really useful extension which gives you the ability to display the product thumbnail image in category products tab in Magento admin. You don't need anymore to navigate through products grid and search for a product to double check it with its image. Save time and have a better overview of the products that are assigned in a category

2. Key Features

- Display product thumbnail in category products tab

- Better overview of the products assigned in a category

- Save time

3. Other Features

- Developed by a Magento Certified Developer

- Meets Magento standard development practices

- Simple installation

- 100% open source

4. Compatibility

Magento Community Edition 2.0 – 2.1 – 2.2

5. Download the Extension

- [Sign in](#) to your account

- Navigate to menu **My Account → My Downloads**

- Find the extension and click to download it

- Extract the downloaded ZIP file in a temporary directory

6. Backup your web directory and store database

Before installing the extension, backup your web directory and store database. All our extensions are tested on clean Magento installations. We can not guarantee of compatibility with third party extensions or customized Magento installations. We recommend to install any extension you obtain from us on a testing Magento installation first and then on a live Magento installation in case of incompatibility with third party extensions.
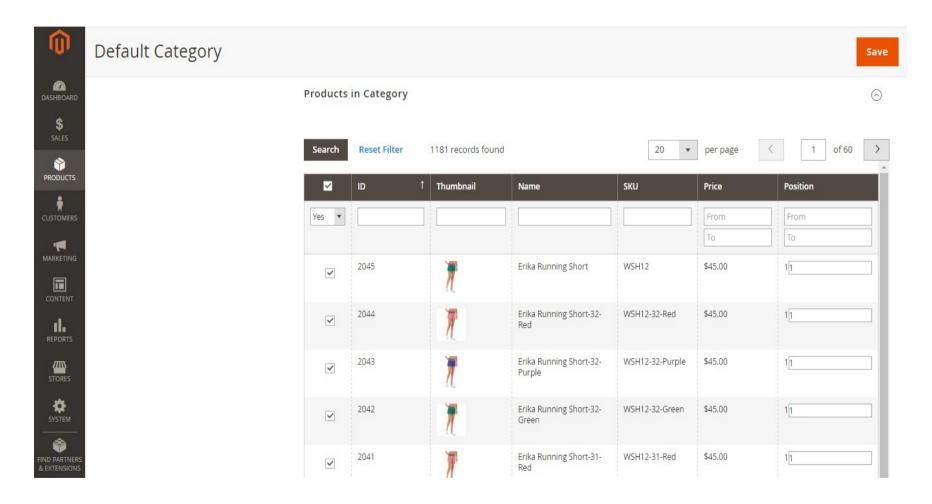

7. Installing the Extension

- Upload the extracted folders and files of the extension to base (root) Magento directory. Do not replace the whole folders, but merge them. If you have downloaded the extension from Magento Marketplace, then create the following folder path **app/code/MageVision/AdminCategoryProductThumbnail** and upload there the extracted folders and files.

- Connect via SSH to your Magento server as, or switch to, the Magento file system owner and run the following commands from the (root) Magento directory:

  - cd path_to_the_magento_root_directory

  - php -f bin/magento module:enable MageVision_AdminCategoryProductThumbnail

  - php -f bin/magento setup:upgrade

  - php -f bin/magento setup:di:compile

  - php -f bin/magento setup:static-content:deploy

- Log out from Magento admin and log in again

8. How to Use
