

Custom Admin Notification

User/Installation Guide

Version 2.3.0

1. Overview

The Custom Admin Notification extension gives you the ability to display a custom notification to the admin users in Magento admin. You can display a different notification to every admin user. The notification is always displayed on the top of every page above the Magento's default warning messages in Magento admin. Easily add a notification and edit text or images using the wysiwyg editor. Simple but useful extension if you want to notify your admin users for something

2. Key Features

- Display a custom notification in Magento admin
- Display a different notification to every admin user
- Add a notification using the wysiwyg editor

3. Other Features

- Developed by a Magento Certified Developer
- Meets Magento standard development practices
- Single License is valid for 1 live Magento installation and unlimited test Magento installations
- Simple installation
- 100% open source

4. Compatibility

Magento Community Edition 2.0 – 2.1 – 2.2 – 2.3

5. Download the Extension

- [Sign in](#) to your account
- Navigate to menu **My Account** → **My Downloads**
- Find the extension and click to download it
- Extract the downloaded ZIP file in a temporary directory

6. Backup your web directory and store database

Before installing the extension, backup your web directory and store database. All our extensions are tested on clean Magento installations. We can not guarantee of compatibility with third party extensions or customized Magento installations. We recommend to install any extension you obtain from us on a testing Magento installation first and then on a live Magento installation in case of incompatibility with third party extensions.

7. Installing the Extension

- Upload the extracted folders and files of the extension to base (root) Magento directory. Do not replace the whole folders, but merge them. If you have downloaded the extension from Magento Marketplace, then create the following folder path **app/code/MageVision/CustomAdminNotification** and upload there the extracted folders and files.
- Connect via SSH to your Magento server as, or switch to, the Magento file system owner and run the following commands from the (root) Magento directory:
 - `cd path_to_the_magento_root_directory`
 - `bin/magento maintenance:enable`
 - `php bin/magento module:enable MageVision_CustomAdminNotification`
 - `php bin/magento setup:upgrade`
 - `php bin/magento setup:di:compile`
 - `php bin/magento setup:static-content:deploy`
 - `bin/magento maintenance:disable`
- Log out from Magento admin and log in again

8. How to Use

Screenshot

Add Custom Admin Notification

System → **All Users** and select a user

The screenshot displays the Magento Admin interface for editing a user's notification. The top navigation bar includes the following options: Back, Delete User, Reset, Force Sign-In, and Save User. The left sidebar contains a menu with the following items: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, FIND PARTNERS & EXTENSIONS, and MAGEVISION. The main content area is titled "Demo Demo" and contains the following sections:

- Password Confirmation:** A text input field.
- Interface Locale:** A dropdown menu set to "English (United States) / English (United States)".
- Notification:** A section with a "Show / Hide Editor" button and a rich text editor. The editor contains the text: "This is a limited account!!In case you need access to more areas please contact the administrator at admin@magevision.com!". Below the editor is a "Path:" label and a text input field containing "p".
- Current User Identity Verification:** A section with a "Your Password" label and a password input field.

The footer of the page contains the following information:

- Copyright © 2016 Magento Commerce Inc. All rights reserved.
- Magento ver. 2.0.7
- [Report Bugs](#)
