

Custom Carrier Trackers

User/Installation Guide

Version 2.2.1

1. Overview

The Custom Carrier Trackers extension gives you the ability to add new custom tracking carriers. As is well known Magento provides default shipping carriers only for DHL, UPS, USPS and FedEx, which sometimes are not enough. So with this extension you will solve that problem. Add as many new tracking carriers as you need with a fully configurable tracking carrier title and URL. The default Magento tracking methods can be disabled. Give the possibility to your customers to track their shipment directly from their account section and the shipment email. Easy management and a full overview of all your custom carrier trackers in Magento admin.

2. Key Features

- Unlimited new completely custom carrier trackers
- Each carrier tracker is fully configurable. Title, tracking url, enable/disabled
- The tracking number gets replaced in the tracking URL automatically, just use the variable #TRACKNUM#
- Additional extra variables #FIRSTNAME#, #LASTNAME#, #COUNTRYCODE#, #POSTCODE#
- Customers can track their order directly from the shipment email
- Customers can track their order directly from their account section
- Default Magento shipping carriers can be disabled
- Store owners also can track shipments from Magento admin directly
- Custom carrier trackers quick inline edit in Magento admin grid
- Custom carrier trackers Magento admin grid for a better overview

3. Other Features

- Developed by a Magento Certified Developer
- Meets Magento standard development practices
- Single License valid for 1 live Magento installation and unlimited test Magento installations
- Simple installation
- 100% open source

4. Compatibility

Magento Community Edition 2.1 – 2.2

5. Download the Extension

- [Sign in](#) to your account
- Navigate to menu **My Account** → **My Downloads**
- Find the extension and click to download it
- Extract the downloaded ZIP file in a temporary directory

6. Backup your web directory and store database

Before installing the extension, backup your web directory and store database. All our extensions are tested on clean Magento installations. We can not guarantee of compatibility with third party extensions or customized Magento installations. We recommend to install any extension you obtain from us on a testing Magento installation first and then on a live Magento installation in case of incompatibility with third party extensions.

7. Installing the Extension

- Upload the extracted folders and files of the extension to base (root) Magento directory. Do not replace the whole folders, but merge them. If you have downloaded the extension from Magento Marketplace, then create the following folder path **app/code/MageVision/CustomCarrierTrackers** and upload there the extracted folders and files.
- Connect via SSH to your Magento server as, or switch to, the Magento file system owner and run the following commands from the (root) Magento directory:
 - `cd path_to_the_magento_root_directory`
 - `php -f bin/magento module:enable MageVision_CustomCarrierTrackers`
 - `php -f bin/magento setup:upgrade`
 - `php -f bin/magento setup:di:compile`
 - `php -f bin/magento setup:static-content:deploy`
- Log out from Magento admin and log in again

8. How to Use

Navigate to Magento Admin under **Stores** → **Configuration** → **MageVision Extensions** → **Custom Carrier Trackers** to activate the extension and disable the Magento default carrier trackers if is needed.

Navigate to Magento Admin under **MageVision** → **Custom Carrier Trackers** to manage your custom carrier trackers and add new one. A tracking url is usually provided from the Shipping Carrier you use for your store.

Create a new shipment for an order adding one or more custom tracking carriers. Send the tracking information to the customer. In the email the tracking numbers are clickable and you can track directly the shipment. Also in the customer account section under **My Orders** → **Order View** → **Order Shipments**.

The extension overrides the default Magento templates for New Shipment and Shipment Guest.

If you have already customized them, you have to go to the Magento admin under **Marketing** → **Email Templates**, find those templates and replace the following line

```
{{block class='Magento\Framework\View\Element\Template' area='frontend'  
template='Magento_Sales::email/shipment/track.phtml' shipment=$shipment order=$order}}
```

with

```
{{block class='Magento\Framework\View\Element\Template' area='frontend'  
template='MageVision_CustomCarrierTrackers::email/shipment/track.phtml' shipment=$shipment order=$order}}
```

An example tracking URL used for a custom carrier tracker with a replaceable tracking number variable would be:

- <https://www.fedex.com/apps/fedextrack/?action=altref&trackingnumber=#TRACKNUM#>

Additional example with extra variables:

- https://www.fedex.com/apps/fedextrack/?action=altref&trackingnumber=#TRACKNUM#&dest_cntry=#COUNTRYCODE#&dest_postal=#POSTCODE#

Additional extra variables that can be used **#FIRSTNAME#**, **#LASTNAME#**, **#COUNTRYCODE#** and **#POSTCODE#**.

Screenshot:

Activate the extension and disable default carrier trackers.

Stores → **Configuration** → **MageVision Extensions** → **Custom Carrier Trackers**

The screenshot shows the Magento 2 Configuration interface. On the left is a vertical sidebar with menu items: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, and SYSTEM. The main content area is titled "Configuration" and shows the "Store View" set to "Default Config". A "Save Config" button is in the top right. The left sidebar of the configuration panel lists categories: GENERAL, CATALOG, CUSTOMERS, SALES, MAGEVISION EXTENSIONS (expanded), and SERVICES. Under "MAGEVISION EXTENSIONS", the "Custom Carrier Trackers" option is selected. The "General" tab is active, showing the "Enable" setting set to "Yes" and a list of "Disabled Default Tracking Carriers" including DHL, Federal Express, United Parcel Service, and United States Postal Service.

Inline Edit carrier tracker

The screenshot displays the 'Manage Custom Carrier Trackers' page. On the left is a vertical sidebar with navigation icons for PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main header includes a search icon, a notification bell, and a user profile labeled 'admin'. A prominent orange 'Add Carrier Tracker' button is located in the top right. Below the header is a search bar with the placeholder 'Search by keyword' and a search icon. To the right of the search bar are controls for 'Filters', 'Default View', and 'Columns'. Below these are 'Actions' and '3 records found (1 selected)'. A pagination control shows '20 per page' and '1 of 1'. The main content is a table with columns: Tracker ID, Carrier Title, Tracking URL, Status, and Action. The first row is selected, and an inline edit modal is open over it, showing 'Cancel' and 'Save' buttons. The table data is as follows:

Tracker ID	Carrier Title	Tracking URL	Status	Action
1	Fedex	http://www.fedex.com/apps/fedextrack/?action=track&trackingnumber=#TRACKNUM#&	Enabled	
2	Ups	https://wwwapps.ackNums=#TRACKNUM#	Enabled	Select
3	Royal mail	https://www.royalmail.com/portal/rm/track?trackNumber=#TRACKNUM#	Enabled	Select

The screenshot shows an email header with the LUMA logo. The body of the email addresses Veronica Costello and provides instructions on how to check the order status. It then displays shipping confirmation details for shipment #000000002 and order #000000002. A table lists shipping options: Custom (000000000), Royal mail (1111111111), and Fedex (222222222). Below this, there are sections for Billing Info and Shipping Info, both listing the same address for Veronica Costello. Further down, it shows Payment Method (Check / Money order) and Shipping Method (Flat Rate - Fixed). At the bottom, a table lists one item: Minerva LumaTech™ V-Tee-XS-Blue (SKU: WS08-XS-Blue) with a quantity of 1. Footer links for 'About Us' and 'Customer Service' are also present.
